Android apps can be written using Kotlin, Java, and C++ languages. The Android SDK tools compile your code along with any data and resource files into an APK, an Android package, which is an archive file with an .apk suffix. One APK file contains all the contents of an Android app and is the file that Android-powered devices use to install the app.

## Application Fundamentals | Android Developers

Enabled by default: Starting with GitLab 11.3, the Auto DevOps pipeline is enabled by default for all projects. If it has not been explicitly enabled for the project, Auto DevOps will be automatically disabled on the first pipeline failure.
