CPT1: Computing Fundamentals  
Converting a negative denary integer into two's complement  
Due to the way that binary numbers work, there is an easy 'trick' that allows very fast conversion. Taking the denary integer - 52 as an example, you can use the three stages shown below:  
Stage one  
Convert the positive form of the number into unsigned ...

Computing 9691 is probably the best site around for the subject. The detailed resources along with the friendly navigation system makes the site very easy to use. Need past papers? on the site, need presentations? on the site, need notes? on the site. There's a reason why this comes up on Google search before the CIE's website.
