The Summit for Prosperity Economics Advisors is definitely not a "typical" industry event. The Summit has been designed specifically for financial advisors and whole life agents who embrace the idea that true wealth and financial independence can be achieved outside the confines and directives of Wall Street, Big Banks and the echo-chamber of media personalities.

The SQL standard way to implement recursive queries, as implemented e.g. by IBM DB2 and SQL Server, is the WITH clause. See this article for one example of translating a CONNECT BY into a WITH (technically a recursive CTE) -- the example is for DB2 but I believe it will work on SQL Server as well.. Edit: apparently the original querant requires a specific example, here's one from the IBM site ...
