solutions given here are presented in the modeling language Mosel (Xpress-MP) as an example. In addition, we often provide a general model (without the data values) as opposed to a specific instance. 2.1 Let UT,UC denote the number of unfinished tables and chairs made, FT,FC be the number of finished

## 1 Section 1.1: What is Deterministic Operations Research?

Operations Research (also called Management Science) is the study of scientific approaches to decision-making. Through mathematical modeling, it seeks to design, improve and operate complex systems in the best possible way. The mathematical tools used for the solution of such models are either deterministic or
