What is Health IT (health information technology) ...

Although Health Informatics (HI) and Health Information Management (HIM) may sound similar, there are many differences between the two fields. Both fields involve the use of technology in the healthcare field and share some common skillsets and job responsibilities, but there are more

differences than similarities between these two distinct career fields.

What are the Differences Between Health Information ...

Health information management (HIM) is information management applied to health and health care. It is the practice of acquiring, analyzing and protecting digital and traditional medical information vital to providing quality patient care. With the widespread computerization of health records, traditional (paper-based) records are being replaced with electronic health records (EHRs).
