The S&P rating is a credit score that describes the general creditworthiness of a company, city, or country that issues debt. The Standard and Poor's company rates how likely a debt will be repaid. The ratings are for information only. They aren't investment recommendations nor do they predict the probability of default.

By Jesse Colombo (This article was written on June 23rd, 2012). The Mississippi Bubble was an economic bubble in France in the early 1700s that developed in parallel with Britain's disastrous South Sea Bubble. The mastermind behind the Mississippi Bubble was John Law, a Scottish financier, gambler and playboy who ascended into the upper echelons of French public finance through his friendship ...
