Then we could draw a histogram from this data, as shown below. A histogram, or a frequency graph is a graph showing the distribution of the data - where it lies.. Or even better, we can draw a relative frequency histogram, where we divide the number of friends in each "bucket" or "class" by the total number of friends, as shown below. The reason this is a better graph is that if you ...

Geometric probability is a tool to deal with the problem of infinite outcomes by measuring the number of outcomes geometrically, in terms of length, area, or volume. In basic probability, we usually encounter problems that are "discrete" (e.g. the outcome of a dice roll; see probability by outcomes for more). However, some of the most interesting problems involve "continuous" variables (e.g ...
