seconds. The meter will beep when switching the backlight ON or OFF unless the beeper is disabled as described in the Setup Mode section of this user guide. Light Meter Sensor Connection The supplied light sensor is connected to the meter via the DIN jack at the top right of the meter.

### **Light Meter - Extech Instruments**

Light meter. The light meter is a tool used to gauge your manual settings. If the light meter reads “0”, it means that there is enough light to capture your image. It also indicates that your image should be well-balanced. If your light meter reads negative, it means the image will be underexposed, or too dark.

### **The Complete Guide to Manual Settings on Your DSLR Camera**

Matrix Metering or Evaluative Metering mode is the default metering mode on most DSLRs. It works similarly to the above example by dividing the entire frame into multiple “zones”, which are then all analyzed on individual basis for light and dark tones.

### **Understanding Metering and Metering Modes - Photography Life**

Exposure compensation is ideal for correcting in-camera metering errors caused by the subject's reflectivity. No matter what metering mode is used, an in-camera light meter will always mistakenly under-expose a subject such as a white dove in a snowstorm (see incident vs. reflected light).
