Difference in Parts of a Diesel Engine. There are many differences between diesel and fuel engines: The spark plus is missing in a diesel engine. That's because the fuel-air mixture is ignited not through a spark, but by a simple compression. The air drawn into a petrol engine is different in different strokes and varies in volume.

What are the Various Parts in a Diesel Engine Functions ...

Construction A four-stroke petrol engine is made up following parts 1 Cylinder It is a cylindrical vessel in which piston reciprocates. //It is made up of cast iron or alloy steel. 2 Piston On combustion inside the cylinder, gases exert pressure o...

What are the parts of a four-stroke petrol engine? - Quora

Mainly Engines which use petrol as a fuel are spark ignition engines. A spark plug creates a spark which is used to initiate combustion in SI engines. Spark plug derives its power either from a battery or magneto. No doubt spark plug is one of the most important car engine parts used in gasoline (or SI engines). Connecting Rod

A lot of outdoor power equipment (such as chainsaws and snow-blowers) also uses two-stroke engines as well. While their construction is simpler than a four-stroke engine, it's still important to know what the function of each of the parts is, so you can get a better understanding of how the engine works as a whole.

Parts of a 2 Stroke Engine | It Still Runs

The ignition system of an internal combustion engines depends on the type of engine and the fuel used. Petrol engines are typically ignited by a precisely timed spark, and diesel engines by compression heating. Historically, outside flame and hot-tube systems were used, see hot bulb engine. Spark

Component parts of internal combustion engines - Wikipedia

Let's look at some key engine parts in more detail. Spark plug. The spark plug supplies the spark that ignites the air/fuel mixture so that combustion can occur. The spark must happen at just the right moment for things to work properly. Valves. The intake and exhaust valves open at the proper

time to let in air and fuel and to let out exhaust.
