### **Introduction to Phonetics and Phonology**

In linguistics, language signs are constituted of four different levels, not just two: phonology, morphology, syntax and semantics. Semantics deals with the meanings (what is signified), while the other three are all concerned with the exponent. At the lowest level we find that everything is composed from a small

### **Introduction to Linguistics - UCLA**

Phonology: The Sound Patterns of Language • There are only a dozen or so features needed to describe every speech sound in every human language - All the languages in the world sound so different because the way the languages use speech sounds to form patterns differs from language to language

### **Phonology: The Sound Patterns of Language**

Phonology •Phonology is largely concerned with the contrastive sounds of a language. •Using the letter analogy again: <b> and <c> are contrastive, because bat and cat are minimally different and have different meanings. <a> and <A> are not contrastive, because ant and Ant are minimally different but have the same meaning.
