The matching hypothesis (also known as the matching phenomenon) is derived from the discipline of social psychology and was first proposed by Elaine Hatfield and her colleagues in 1966, which suggests why people become attracted to their partner. It claims that people are more likely to form and succeed in a committed relationship with someone who is equally socially desirable.

### **Matching hypothesis - Wikipedia**

The concept of culture is among the most widely used notions in sociology. Normally, one can presume culture to be equivalent to higher things of the mind such as art, literature, music and painting. However, in the perspective of sociologist it goes
