Ventilation Industrial Manual Book Free

Ventilation is the intentional introduction of outdoor air into a space and is mainly used to control indoor air quality by diluting and displacing indoor pollutants; it can also be used for purposes of thermal comfort or dehumidification.. The intentional introduction of outdoor air can be categorized as either mechanical ventilation, or natural ventilation.

An industrial safety system is a countermeasure crucial in any hazardous plants such as oil and gas plants and nuclear plants.They are used to protect human, industrial plant, and the environment in case of the process going beyond the allowed control margins.. As the name suggests, these systems are not intended for controlling the process itself but rather protection.
