What is a Geometric Mean? What is a geometric mean, and how is it different from a "regular" mean? The geometric mean is not the arithmetic mean and it is not a simple average. It is the  $n$ th root of the product of  $n$  numbers. In layman's terms, that means you multiply a bunch of numbers together, and then take the  $n$ th root, where  $n$  is the number of values you just multiplied.
