Question: "Why did God create such a vast universe and other planets if there is only life on Earth?"
Answer: The question of whether God created life on other planets is certainly fascinating. Psalm 19:1 says that "the heavens declare the glory of God, and the firmament shows His handiwork."

Why did God create such a vast universe and other planets ...

Looking toward the heavens, or looking deep into atoms, we find mostly emptiness. I'll take you on an illustrative tour to explain why the universe and all matter is basically empty.

Do you find yourself glancing at the clock at the same time every day? I've been seeing 11:11 for what feels like forever. Maybe you see 2:22, 3:33, 4:44, or 5:55 on the regular. It's just like hearing the same song all the time — you could look at it as random coincidence, or you could see it as a message from the universe.

Why Do I Keep Seeing 11:11? It's A Message ... - Gala Darling

I am not sure this is the correct answer but I read it somewhere. When Douglas Adams wrote *The Hitchhiker's Guide to the Galaxy*, he added a central joke which has become more famous over the years than the novel itself: "The answer to the ultimate question of life, the universe and everything is 42."

Why and how is 42 the answer to life, the universe and ...

In 2006, the IAU voted to remove Pluto from the list of planets in the Solar System. Instead, Pluto, and other large objects would be classified as Dwarf Planets. Why Pluto is no longer a planet.

Why Pluto is No Longer a Planet - Universe Today

But much more important than these conundrums is the persistent question of the fine-tuning of the parameters of the universe: Why is our universe so precisely tailor-made for the emergence of life?

Why Science Does Not Disprove God | Time

If God can do anything (if He is truly omnipotent), why did He take six days to create the universe, when He could have done it instantly? Astronomical data indicates that the universe began 13.8 billion years ago, 1 but the earth was not formed until 4.5 billion years ago. 2 Why would God wait 9.2 ...

If the Universe is expanding, we can understand why distant galaxies recede from us as they do. But then why aren't stars, planets and even atoms expanding, too?

This Is Why We Aren't Expanding, Even If The Universe Is

Back in the 1980s, astronomers were caught up in a debate so huge, you could drive a universe through it. The point of contention was a number called the Hubble constant, which describes the rate at which the cosmos is expanding and, by extension, how much time has passed since the Big Bang: the slower the expansion rate, the older the universe.

Why We Still Don't Know How Fast the Universe is Expanding

Thinking about this logically, I think we should disregard all the warnings and get the outgoing signals rolling. If we catch the attention of super-advanced beings, yes, they might decide to wipe out our whole existence, but that's not that different than our current fate (to each die within a century).

The Universe is all of space and time and their contents, including planets, stars, galaxies, and all other forms of matter and energy. While the spatial size of the entire Universe is unknown, it is possible to measure the size of the observable universe, which is currently estimated to be 93 billion light years in diameter. In various multiverse hypotheses, a universe is one of many causally ...
